The 10th Annual Columbus Walk to End Lupus Now

The Georgia Chapter of the Lupus Foundation of America (LFA) is pleased to continue the growth and expansion of our signature event, the Walk to End Lupus Now, with the Columbus Walk on Saturday, October 3rd! The location is TBD.

Building on the leadership of Detra Holloway and the Diamond Butterflies, more than 500 walkers raised over $34,000 at the 2019 Annual Columbus Walk to End Lupus Now.

We want do DOUBLE that number and we need YOUR help. Our Columbus and Atlanta Walks support 70% of our Chapter’s annual budget.

We kindly ask your business or group to consider the enclosed sponsorship opportunities to help us achieve our goals. All Presenting Sponsors, $5,000 and above, will get their company’s logo on materials for both the Columbus Walk and Atlanta Walk. The Georgia Chapter’s Atlanta Walk is the largest LFA walk in the nation, with more than 8,000 walkers in 2019.

The Georgia Chapter is one of the fastest growing LFA chapters in the nation because we are building corporate partnerships and engaging people who care about someone with lupus: their daughters, mothers, sisters, fathers, brothers and sons.

Ninety cents of every dollar donated stays in Georgia to ensure the Chapter continues to provide the only free statewide lupus programs and resources. This includes eleven education programs, support, advocacy and awareness for those living with lupus, including the Columbus community. Currently, Detra Holloway facilitates monthly support group meetings in Columbus.

The Lupus Foundation of America is the only national force devoted to solving the mystery of lupus while giving caring support to those who suffer from its brutal impact. Through a comprehensive program of research, education and advocacy, we lead the fight to improve the quality of life for all people affected by lupus. The Georgia Chapter supports the national LFA research efforts funding and advocating for investment in lupus.

The cruel mystery does not daunt us. Join us in the fight to end lupus!

Lupus affects over 55,000 Georgians and 1.5 million Americans, mostly women aged 18-45 but also men, children and women of all ages.

Lupus affects more than the combined number of those affected by MS, cystic fibrosis, cerebral palsy, sickle cell anemia, leukemia and HIV.

Lupus is an unpredictable, life diminishing and life devastating autoimmune disease which can affect any organ system, skin, joints, kidneys, brain, heart, lungs and blood.

Lupus is difficult to diagnose and is very misunderstood in the medical and lay community.

Lupus is three times more likely to strike minorities, including African-Americans, Hispanics and Asians.

There is no known cause or cure and the incidence of lupus has increased in the past 20 years.
